

Storm Cloudy Ale

Storm is styled as an American Pale Ale and has been masterfully balanced to exude not only a fantastic hop character but also relay a very satisfying biscuity malt character that titillates the tastebuds.

The hops in this beer are from all over the world but it is the very noticeable Cascade addition from the U.S.A that steals the show coupled with the the sweet malt and bready character the palate is elated with a beautiful orange mango citrus flavour and aroma. The fuity theme is backed up with a generous addition of Australia Galaxy hops and U.K East Kent Goldings that impart a range of flavours including notes of rock melon and stone fruit, as well as hints of rich earth and spice.

The beer has medium to high bitterness, giving the beer an assertive quality which is ideal for matching with food, especially Asian or chilli-inspired dishes (hops can help break down the bittering compounds in chillies).

Burnt orange in colour with an enticing red hue, the cloudiness of the finished product is a result of deliberately leaving some of this healthy yeast in the beer to continue to work and keep the beer in top condition. The barrage of fruit flavours and the cleansing bitterness readies the palate for the next mouthful.
